WORK EXPERIENCE

Ouieqare - CTO Full-stack Developer

2023 - Now

- **Designed and developed a complete CRM system using the MERN Stack** (MongoDB, Express.js, React.js, Node.js).
- **Built and integrated RESTful APIs** for seamless frontend-backend communication.
- **Deployed applications on Heroku**, managed source control with Git and GitHub.
- **Customized Zoho CRM using Deluge** scripting to automate workflows and improve efficiency.
- **Implemented SEO optimizations** to enhance web visibility and user engagement.
- **Collaborated in Agile workflows**, delivering features through sprints and iterations.

TOCnDix -- Full Stack Developper

2022 - 2023

- Developed server-side logic and REST APIs using JavaScript.
- Built dynamic and responsive Single Page Applications (SPA) with React.js and CSS3.
- Designed and maintained relational databases using PostgreSQL.
- Participated in the full development lifecycle: design, development, testing, and deployment.
- Worked in Agile teams, using tools like GitHub, Jira, and code versioning best practices.

Segula Technologies -- Full Stack Developper
2021

- Developed web components with Angular and TypeScript, styled using Bootstrap and CSS.
- 🔐 Managed SQL databases, including table modifications and schema updates.
